

## Wound Instructions for Halo Graft/Split Skin Graft

- Please leave all bandages in place until you come for your review appointment in 1 week.
- The bandages must be **kept dry for** the whole **7 days**. If the halo graft is located on the lower leg, please make all efforts to keep your leg elevated as much as possible over this 7-day period.
- You may get up to use toilet facilities and have something to eat, however once you have completed these activities, you should return to elevating and resting your leg.
- If the wound becomes increasingly sore, or you have any concerns, please call the Skin Wise clinic on **08 8230 6999**.
